

Amantys Power Electronics Limited announce distribution agreement with Megateam Semiconductors in China

Cambridge, United Kingdom, June 22nd, 2016 – Cambridge-based Amantys Power Electronics Limited (“Amantys”), the technology leader in medium and high voltage gate driver solutions, and Shenzhen Megateam Semiconductors Co., Ltd. (“Megateam”), a specialist power electronic solutions distributor, have signed a distribution agreement for the supply of Amantys’ innovative gate driver solutions in the Chinese market.

Under the agreement, Megateam will make Amantys’ digital gate driver solutions available to the company’s wide range of customers in the traction, power grid, renewables and industrial motor drive markets across China. “As the forerunner in advanced digital driver technology development, Amantys is a powerful addition to our current product line”, said Anthony Xia, Managing Director at Megateam. Bryn Parry, General Manager at Amantys, said “Megateam’s strong experience in the Chinese traction industry will open a plethora of opportunities for Amantys in China. We look forward to building a long-term, mutually beneficial partnership”.

About Amantys Power Electronics

Amantys was established in 2010 in Cambridge, United Kingdom and is a wholly owned subsidiary of Maschinenfabrik Reinhausen GmbH. The company offers advanced gate drivers that deliver a scalable, cost effective solution to meet the challenges of designing reliable and efficient power converters in medium and high voltage applications.

Amantys Gate Drives are unique in offering Amantys Power Insight communications technology that allows performance optimization, monitoring and data logging technology, enabling manufacturers to observe critical converter characteristics during development, commissioning and operation of power converters.

About Shenzhen Megateam Semiconductors

Megateam was established in 2004 in Shenzhen, China. The company distributes a wide range of products; including power modules, discrete devices, optical couplers and capacitors. Megateam’s partners include Mitsubishi Electric, Infineon, Epcos, Avago, and Vacuumschmelze.

In addition to its Shenzhen headquarters, Megateam operates local branch offices in Tianjin, Yongji, Shanghai, Ningbo, Shenzhen, and Hong Kong. The company also cooperates with universities for research & development in the following areas: low power electric vehicles, automatic doors, general purpose inverters, traction, solar power and industrial machinery.
